

# VironXT<sup>MKII</sup>

PREMIUM ENERGY EFFICIENT  
VARIABLE SPEED PUMP

AstralPool's Viron XT variable speed pumps are incredibly efficient, reducing the lifetime pool operating and ownership costs while offering incredibly high flow and pressure when required to meet the most demanding applications.

## ENVIRONMENTALLY FRIENDLY

The Viron XT pumps reduce energy consumption by up to 90% and effectively reduce greenhouse emissions by up to 90% (when power supplied from coal fired power plants). But manufacturing a pump also contributes to greenhouse emissions. The larger the motor, the more raw materials go into it, and the more greenhouse emissions are used to produce the motor. Astral Pool produce the right size motor for your individual application, reducing our carbon footprint in the manufacturing process.

## ENERGY SAVINGS

Viron XT pump when programmed to the correct speeds and flow rates required for different pool operations, can drastically reduce your overall energy consumed, saving you huge on annual operational costs. In some cases, can save you upto 90% of energy costs when compared to a conventional single speed pump. Our Viron XT pumps are on of the highest MEPS Energy star rated pumps on the market.

## BUILT FOR THE TOUGHEST CONDITIONS ON EARTH

The Viron XT Pump is a significant investment. Each individual component is carefully designed and selected for maximum life span in the tough Aussie climate. 316 stainless steel hardware, robust engineering plastics and high quality silicone seals create a pump that lasts. Even the motor and sophisticated electronics are carefully designed and manufactured to be easily serviced and repaired.

## EFFICIENCY FOR ALL

The Viron XT Pump offer speed settings from 600 RPM up to 3600 RPM to select the perfect flow rate to suit whatever your pump is being used for. Suitable from the gentle circulation to the occasional vacuuming, filter cleaning, and specific applications such as water features, spa jets and in floor cleaning.

## SIMPLICITY OF OPERATION

Three programmed speeds suitable for most pools, the Viron XT can be easily reset with simple up or down buttons to more specific desired speeds. The Bluetooth feature seamlessly connected the Viron XT pumps to the Halo Chlor for a better control.

## DIMENSIONS

## SPECIFICATIONS

| MODEL NAME          | MODEL NO. | VOLTS | PHASE  | INPUT WATTS | FULL LOAD AMPS | FLOW RATE @ 8 M/H | CONNS "MM" | ENERGY CONSUMPTION (KWH/Y) | ENERGY STAR RATING |
|---------------------|-----------|-------|--------|-------------|----------------|-------------------|------------|----------------------------|--------------------|
| VIRON P320C XT MKII | 11547     | 240   | Single | 1250        | 7.5            | 303lpm            | 40/50      | 514                        | 6                  |
| VIRON P520C XT MKII | 11548     | 240   | Single | 1800        | 8.0            | 580lpm            | 50/65      | 734                        | 4.5                |

## UNIQUE HIGH-PERFORMANCE FEATURES

Viron XT fast prime mode operates the pump at higher than normal speeds during the priming period and reduces the time it takes to expel the air in the pump and system by more than 30%. This reduces wear on the pump components, increasing the pump life. Once the pump is fully primed it automatically reverts back to the last operating speed selected. Operating at high pressures when driving spa jets, in floor cleaning or water features, the Overdrive mode will increase and govern the speed of the pump to achieve truly high flow and pressures. The pump will never draw excessive power but also ensure your pool system is operating at its best efficiency.
